Beko plc continuously seek improvements in specification, design and production of products and thus alterations take place periodically. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specification, nor does it constitute an offer for the sale of any particular appliance.

BEKO

The Beko
Home Appliance Collection

BEKO

Beko Refrigeration Built in for High Performance

Many kitchen designs feature integrated appliances to make maximum use of the available space, and to maintain a carefully created kitchen style. The Beko Refrigeration range of Built-in appliances had been developed to offer maximum performance, convenience and reliability. The wide range of practical features ensures all your cooling needs are met, while the style and finish of the products reflect the excellent build quality and design of the collection.

Energy Efficiency Across The Range

Beko built-in refrigeration models are **'A' energy rated**, providing great performance with minimal energy consumption. Selected models have been upgraded to **'A+' energy rating**, consuming up to 24% less energy than standard 'A' rated models.

Freezer Guard Technology

Beko's Freezer Guard technology uses an electronic temperature control system ensuring the freezer carries on working even when ambient temperatures plummet. The system ensures that food stays frozen by keeping the freezer **working in ambient temperatures as low as -15°C**. As well as giving peace of mind, you have the opportunity to locate their freezer and frost-free fridge freezer in their kitchen, or anywhere else in the home. The extra storage space is ideal for Christmas and perfect for large families.

Fridge Features

Ambient Temperature

All Beko fridges and larders can operate in lower ambient environments down to 5°C.

Chrome Coated Wire Wine Rack

A stylish, elegant and safe way to store your bottles of wine cool and ready to be poured. Applicable to selected models only.

Durable and Easy-clean Glass shelves

Made of strong and durable glass, the fridge shelves are easy to clean. They are also adjustable and can be simply placed on different levels for maximum use and flexibility.

Freezer Features

Frost Free.

Only applicable to combi fridge freezers BC50F and BC73F.

No need to manually defrost the freezer. Frost Free prevents ice building up on the sides and restricting valuable storage. The air circulation enables food to freeze faster while maintaining its natural flavours.

Clear Freezer Fronts

To easily identify what is available in the freezer.

Beko Laundry Integrate Energy Efficiency and Performance for Modern Living

Combining great performance with style, the Beko Built-in laundry range has been designed for modern living. The models feature innovative programmes to help protect your clothes and keep them looking as good as new for longer.

The Beko 7kg washing machine with its market-leading capacity and high maximum spin speed gives you complete control of the time and energy spent on laundry whilst the Beko washer-dryer is a great space saver offering all the features of a washing machine and tumble dryer.

7Kg Washing Machine WM171641 Special Programmes and Features

WM171641 is **A+ energy rated** helping you saving money by achieving up to 10% reduction in energy consumption compared with 'A' energy rated models.

Eco Clean 20°C

Washes 3kg of lightly soiled clothing at 20°C and **saves up to 70% of energy compared to Synthetic 40 programme.**

Daily Quick programme

Wash a full load in just 39 minutes.

Super Fast programme

Wash 2kg of laundry in only 14 minutes.

Refresh programme

Short 17 minute cold water wash to revive clothes.

Baby and Toddler programme

Ideal for delicate garments and for those with sensitive skin or detergent allergies.

Self Clean programme

Works without laundry to clean the tub and drum for hygiene care.

Interactive LCD display

Easy to view and easy to use, the LCD display allow you to monitor the progress of your wash programme. As well as displaying the time remaining of the chosen programme, it allow you to select and change the temperature and spin speed for each programme, set a time delay or add any options to complete the cycle.

Liquid detergent compartment

With a unique design offering special liquid detergent indicators, the easy to access drawer will minimise any spilling.

Beko Integrated Dishwashers

A Quick, Clean And Quiet Performance

Whether you choose a full size or a slimline model, Beko Built-in dishwashers are packed with special programmes, great features and storage solutions that will help you save time and money.

World's Fastest 'A' Rated Wash Programme in 58 minutes

Beko provides world class performance with this innovative programme. It will wash and dry in just 58 minutes, giving you perfect results every time. The 'A' rated programme makes life easier and more economic helping you save time and water.

'AAA' Energy Rating

With 'AAA' rating for energy efficiency, cleaning performance and drying effectiveness, Beko built-in dishwashers provide great performance with minimal energy consumption.

Rapid 30 Minute Programme

For lightly soiled items.

Lowest Noise Level Available

With the noise level reduced from 54dBA to 49dBA, Beko dishwashers are 68% quieter than other models.

Removable Sliding Cutlery Basket

The basket readily slides from left to right allowing dishes and pans to be more effectively loaded. It can also be removed to make space for larger items.

Easy Load Upper Basket

Thanks to the Acrobat System, the height of the upper basket can be easily changed, even when fully loaded, to create extra space for larger dishes and pans.

Folding Plate Racks

Plate racks can be folded aside to allow large dishes and pans to be accommodated.

EASY TO FIND INFORMATION

Beko home appliances are packed with clever features and helpful ideas; complete with outstanding environmentally-friendly performance and cutting edge technological innovations. These features are highlighted in this brochure by special coloured icons and symbols and a useful comparison table.

FEATURES

Features that make it quicker, easier or simpler to get things done

INNOVATION

Indicates that we have incorporated the latest engineering and technology

ENVIRONMENT

Beko's energy efficient and environmentally friendly features

BEKO - COMMITTED TO GIVING YOU MORE

Life is becoming more and more demanding with a greater emphasis on performance. This is especially true of the kitchen, where time and energy are at a premium in busy households. As a product designer and manufacturer, Beko has directed its research and development into meeting the increasingly higher demands of householders in efficiently completing their daily routines.

More Features to Let Life Happen

Easier and more versatile cooking; quieter and more efficient dishwashing; faster and more economic washing and drying; safer and more flexible cooling storage - the new Beko range is packed with innovative features to make life easier. When you buy Beko, you know that you are getting performance and convenience that improves everyday life.

Innovating to Meet Your Requirements

Beko has achieved its market-leading position by keeping abreast of the evolving requirements of home owners and making the latest product innovations affordable. Beko also reviews manufacturing and distribution techniques to ensure that its production is carried out in the most efficient manner. In fact, Beko's production facilities are state-of-the-art, employing the latest technologies and equipment.

Greater Performance for Greener Credentials

The need to **save energy** and resources has never been more important than now. Ever rising domestic costs must be countered by measures to reduce energy consumption in and around the home. Beko has long been a leader in supplying energy efficient kitchen appliances and now offers market leading performances that exceed expectations. Whether it is in the form of highly energy efficient fridge freezers and cookers or low water consumption washing machines and dishwashers, Beko gives you the best in environmentally friendly appliances.

New Look and Attractive Design

The new models feature attractively re-designed fascias that not only improve appearance but also greatly enhance ease of access to functions and settings. The new design improves still further the stylish good looks of Beko appliances and reflect the very best of modern design trends. The Beko name has always been synonymous with style and this development is set to add more to that reputation.

Beko Built-in Range

Create a space where elegance and style is perfectly blended with performance

Blending functionality and simplicity with elegance and style, Beko Built-in appliances combine the latest technology with modern aesthetics. The Beko Built-in range allows you to create affordable and contemporary kitchens designed to withstand the demands of a busy family life.

All Beko Built-in appliances are **'A' energy rated or better**; and offer a wide range of practical features suited to your individual needs.

The latest collection features two premium ovens; one with the benefit of the 'Programme clean' technology and another offering 30% saving on 'A' rated energy consumption.

Meticulous attention to detail has ensured that all the electric and gas hobs are manufactured to the highest standards, with the integrated microwave and cooker hoods adding a great finishing touch to the range. With its market leading large capacity and high maximum spin speed, the 7kg washing machine is a worthy addition to the new collection.

Beko 2 Year Warranty

For peace of mind your new Built-in home appliance from Beko is guaranteed against the cost of breakdown repairs for two years from the date of original purchase.*

*This covers actual and sudden mechanical/electrical failure or breakdown which results in the sudden stoppage of a product's normal functions and which necessitates repair to resume those functions. It does not include out of warranty, incorrect installation, no fault found, wear and tear, misuse, failure to comply with product instruction book or failures due to incorrect installation. Repeat calls due to the wrong diagnosis or commercial use will also be excluded.

Beko Ovens
Designed with Convenience Built-in

Beko Built-in ovens use state-of-the-art technology and a range of practical features to give you maximum functionality and flexibility in minimal space. Whatever model you choose, Beko Built-in ovens look good whilst providing a range of cooking solutions to meet your requirements.

Efficient Energy Rating Across the Range

All Beko Built-in ovens* use **20% less energy** than standard 'A' rated models, offering the best performance with minimum energy consumption.

Saves 20% more
Than A class

The new oven OIM25503 features **the lowest energy consumption in the world in its class - 30% better than A+.**

Saves 30% more
Than A class

'Programme Clean' Technology - Simple, Economic, Hassle-free Oven Cleaning

This advanced technology enables ovens to be cleaned without the need for expensive and abrasive detergents or scrubbing or scraping. When the function button is pressed, the oven heats up to **500°C**. During the cycle all cooking residues, oil and fat spillages are converted into a thin layer of ash, which can be simply wiped away with a damp cloth.

Oleophobic Nano Coating Technology
Keeps Glass Doors Clean

With oleophobic nano coating on the inner glass doors, Beko ovens maintain their shiny good looks for years. Thanks to this special technology, doors simply require cleaning with a soapy water and a soft cloth after every 20 cooking cycles look good as new.

Cooking made simple with Beko

Cooking modes and functions*

Top Heating Element

Top heating element only - for dishes that require additional heating on top, such as lasagne or rice pudding.

Bottom Heating Element

Base cooking element only - ideal for quiches or dishes that require additional heat at the base.

Top and Bottom Heating (conventional)

For even heating from above and below. Ideal for base browning foods such as lasagne and hotpots.

3D Cooking

Convenient and time saving through better heat distribution.

Defrosting

Quick and hygienic - ideal for delicate foods which require a lower temperature defrost.

Fan Cooking

Even heat distribution for multiple level cooking. Extremely economical and effective with reduced cooking times and temperatures.

Slow Cooking

Allows better flavour distribution and helps tenderise many meat dishes through the cooking process.

Fan Grilling

To brown food and seal in juices while fan circulates heat to cook food evenly through.

Fan With Half Grill Facility

More economical than the turbo grill as it uses the centre section only.

Grill

Uses radiant heat from the grill to brown food quickly.

Half Grill

Combining variable power control and adjustable height, the half grill gives flexibility and control.

Oven Interior Light

For easy progress checking without opening the door.

*Except OTF12300X

*Functions and cooking modes may vary according to models. Please check specification tables on our website www.beko.co.uk

Beko Ovens Designed with Convenience Built-in

Large Oven Capacity - 65 Litres

With its 65 litres capacity, the Beko oven has amongst the most spacious interior in its class. It will provide enough room to roast a large turkey or prepare a big feast for your family and friends. It also features a recessed grill for optimum cooking space and safety.

Robust Oven Door

Thanks to the sleek and solid door hinges design, the oven door is durable and robust to support heavy dishes.

Quiet operation

At only **46dBA noise level** when fan cooking, Beko Built-in ovens are amongst the quietest available.

Full glass inner door

Designed with a full glass panel, the oven door interior has a large viewing window for maximum visibility and is easy to clean with a single wipe. For more extensive cleaning, the high quality hinges will allow you to remove the door instantly.

Telescopic wire shelves

The extending arms of the telescopic wire shelf system enable easy and safe access to the cooking tray when basting or serving dishes.

Easy to clean oven interior

Made with a single piece with formed enamel runners*, each and every corner of the cavity is easy to clean. The catalytic liners* mounted on the back of the oven are ideal for self cleaning, absorbing grease and reducing odour during high temperature cooking programmes.

The side racks* fixed to the oven can be easily detached without any tool, making cleaning even easier and quicker.

Large display digital timer

The display allows full control and flexibility. Symbols and functions are easy to view and use. The 'key lock' feature will prevent any accidental pressing of buttons that might change the selected programme or mode.

Full size grill tray

The full size tray will give you optimal cooking space and perfect results. In addition, the deep tray design is ideal for roasting and baking.

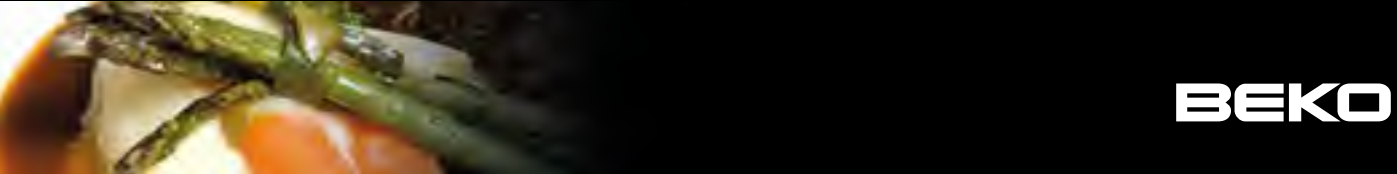

Stainless steel fascia panel and handles

Beko built in ovens are made of stainless steel fascia panels and handles creating a modern and stylish look and give a robust and elegant finish to the product.

The same finish is used in our hob range to create a harmonious look in your kitchen.

Economic -
A cleaning cycle
only costs 25p

Multi-Function Oven with
'Programme Clean' Technology

No need for expensive and messy cleaning chemicals. No need to scrub and scrape. Just push the button and the oven heats up to 500°C turning food scraps, fat and oil spillages into ash, which can be simply wiped away with a damp cloth.

The spectacular results are achieved amazingly economically - the cleaning cycle costs around 25p or even less using the oven's delayed start to take advantage of off-peak electricity.

Two 'Programme Clean' Programmes

- Full 'Programme Clean' programme** (120 minutes)
- for heavy soiled ovens.
- Eco 'Programme Clean' programme** (90 minutes)
- for lightly soiled ovens.

'Cool Door' Technology

Safety is fully covered - the oven automatically locks when it begins to heat up and the special 'Cool Door' has four layers of glass to ensure that the external temperature does not exceed a safe **70°C**.

Beko Electric Hobs

Easy-to-Use, Easy-to-Clean

With easy-to-use control panels, easy-to-clean smooth surfaces, flexible cooking zones and reliable safety features, Beko Built-in electric hobs are the practical aid to your kitchen.

Touch Control

Beko ceramic hobs feature touch control panels giving full control and flexibility on the level of heat for each cooking zone. Easily visible residual heat indicators show when the surface is cool enough to touch and clean.

Advanced Safety Features

For complete peace of mind, Beko ceramic hobs have advanced safety features. The **'Child Lock'** function prevents accidental pressing of buttons, whilst the **'Automatic Shut Off'** feature is activated when the cooking zones have been left working for an unusually long period of time.

Easy-to-Clean Glass Surfaces

Stylish, smooth glass surfaces are scratch resistant and easy to clean, further enhancing the appearance and functionality of your kitchen.

Induction Hob Cooking

Efficient, fast and safe - How does it work?

With its quick and responsive heat control settings, the Beko induction hob **HII64400AT** offers all the benefits of gas cooking but in the form of an elegant, easy to clean ceramic hob. An electronically powered coil produces an electromagnetic field meaning the induction hob only heats up if there is a pan on the cooking surface. The magnetic field penetrates the metal of the saucepan and sets up an electric current, generating heat which warms up the food or liquid inside. As soon as the saucepan is removed from the cooking surface, the area turns off automatically. Induction hobs can be used with any magnetic metals pans such as iron or stainless steel finish.

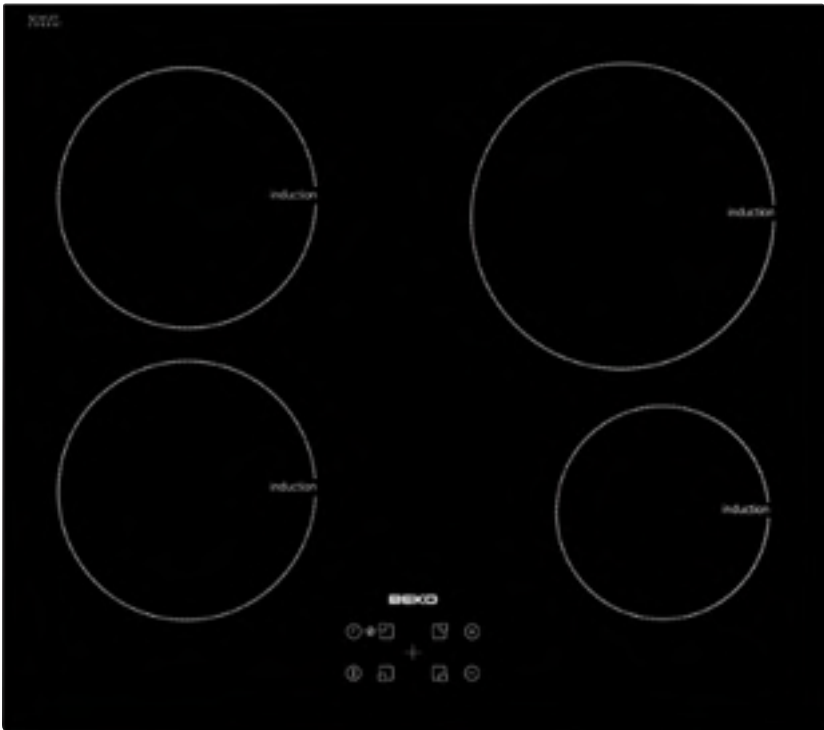

Experience the new way of cooking with Beko

Beko Gas Hobs

All the Benefits of Traditional Cooking

From professional chefs to those who are passionate about cooking, the direct heat of a gas hob is a preferred way of cooking for many people. To meet individual cooking needs and kitchen designs, Beko offer a range of sizes and colour options.

Cast Iron Pan Supports

For maximum stability, enabling you to use pots and saucepans of any size without the risk of tilting or sliding, Beko provide cast iron pan supports. They have the added benefit of enhancing the stylish and professional look of Beko gas hobs.

Wok Burner

The wok burner ring allows food to be cooked rapidly without compromising any nutritional values. The ring ensures heat is distributed evenly, resulting in excellent cooking performance over a shorter period of time.

One-piece easy-to-clean Hob Surface

Made as a single piece with easy-clean rounded corners, these hobs are designed for quick and easy maintenance.

Flame Safety Device

All Beko gas hobs have a 'Flame Safety Device' fitted as standard. The device senses when the gas flame has gone out and automatically cuts off the gas.

The high output wok burner provides rapid and even heat for stir fry dishes.
